

LIGHTING

Gloster
gloster.com

A stone-weighted lamp for spaces that don't do indoors only. **Ambient Pebble** pairs a solid base with a powdercoated aluminum shade, then adds remote-controlled dimming like a quiet party trick. Eight light settings, cordless freedom and patio-proof poise – made for terraces, pool decks and alfresco tables that run late.

Landscape Forms

Louis is a catenary that behaves like urban choreography. Its clean linear profile strings together unobstructed planes of light, guiding pedestrians through “slow velocity” spaces where people linger, talk and actually look up. Installed in sequence, it becomes rhythmic wayfinding. Modernist, social and quietly sustainable.

Demi Sconce feels like jewelry that decided to become architecture. Using centuries old sand casting, its tactile glass diffuses light with a soft, milky hush, cradled by a hand-formed brass armature. The result is refined but human. A fixture that reads as craft, history and glow, all at once.

USAI Lighting
usailighting.com

LittleTwos NXT packs remarkable power into a 2-inch form. Singles, Multiples and Pinhole options deliver precise illumination with advanced glare control, adapting effortlessly across hospitality and retail settings. Compact but commanding, NXT shows how small-scale lighting can define a space with confidence.

Cuvee

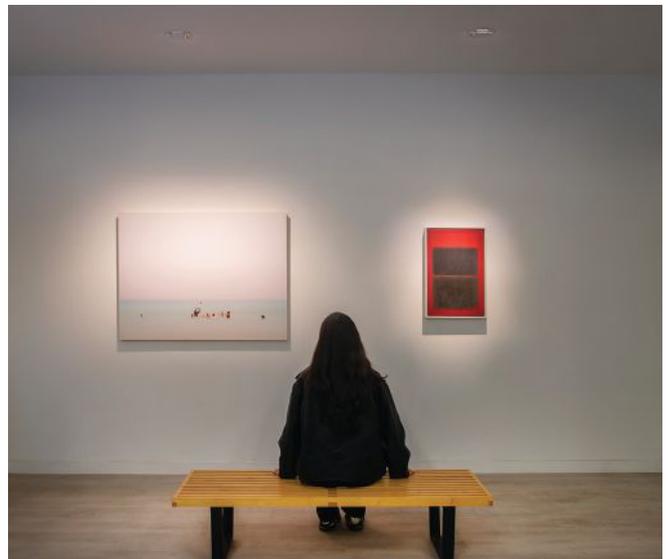

shopcuveehome.com

Created by Cuvée distills interior designer Bailey Ward's refined eye into lighting poised between elegance and ease. Thoughtfully layered materials meet approachable luxury, offering pieces that feel curated rather than constructed. It's elevated, harmonious and intentional for homey spaces.

Pierborne
pierborne.com

When the lights must stay on, **Emergency Power Vault** steps in with industrial grace. The UL924-compliant backup transforms any fixture into emergency lighting, eliminating bulky bug-eye units. It's reliability that preserves design integrity even in moments of darkness.

Revelite
revelite.com

CL-6 is ceiling lighting with curator energy. Fully adjustable and engineered for control, it shapes beams to flatter a single artwork or distribute light evenly across varied forms and sizes. Sleek enough to disappear, powerful enough to matter, it's the kind of system that makes the display look intentional, not merely illuminated.

ALU
alu.com

Plot showcases a streamlined radial composition in galvanized steel and classic blue finishes, featuring centered hangbars and trapezoidal shelves in metal and millwork. The circular structure invites visitors to move around, step inside and immerse themselves in product.

WS Display
wsdisplay.com
The company produces custom light boxes, display shelving, retail walls, counters and towers.

OPTO Intl.
optosystem.com
Integrated Lighting System is designed to enhance visibility, attract attention and extend shopping time. Includes a low-voltage system for safe, efficient operation with multiple color temperatures to complement any brand environment.

Gloster
gloster.com

This modular seating system dubbed **GRID Collection**, and designed by Henrik Pedersen in 2014, can be used outdoors or inside. Defined by its clean lines and refined teak and ceramic details, it features a slim aluminum frame and modern appeal.

Ethnicraft
ethnicraft.com

Blend Bistro Dining Table has interchangeable tabletops and a conveniently sized silhouette. Offered in different materials and finishes, the flexibility to adapt to the aesthetic (or seasonality) with the simple change of a tabletop is ideal for the ever-changing conditions of public spaces.

Pacific Northern
pacificnorthern.com

Recently this company delivered a complete millwork, fixtures and props package for the Michael Kors flagship store at Rockefeller Center in New York (shown). The finished environment elevates the customer experience and reinforces the brand's presence within one of the world's most prominent retail destinations.

Circle Visual
