GLOSTER

2027 PRODUCT INTRODUCTIONS

AMIES

Designed by Gabriele & Oscar Buratti

GLOSTER

“This project for GLOSTER was born from the not-so-obvious goal of creating products designed to remain outdoors - exposed to sun and rain, heat and cold, even snow - without the need to be brought inside or covered. Furniture meant to be used in a garden, by a poolside, on a terrace or in an open patio, in any season.

For some time, we had wanted to work with aluminum and challenge ourselves by mastering the techniques typically associated with this material: profile extrusion, machining from solid blocks, and casting of potentially very complex components. Gloster involved us in this challenge, providing the advanced technology of its mechanical workshop, its tools, and the great expertise of its engineers.

This project fits into a line of typological and material research explored by great Masters of design with outstanding results, such as Schultz or the Eameses, and more recently Alberto Meda. The collection features an aluminum structure and a tensioned polyester mesh fabric coated with PVC. Our work focused, on the one hand, on achieving a sober elegance in the forms of the various pieces, and on the other, on developing sophisticated technical and detailing solutions.

Amies, the name of this project, can be interpreted in two ways. In the Milanese dialect, Amies means “friends,” reflecting the idea that these pieces can become our companions and stay with us for a long time - both in terms of durability and emotional value. If instead we remove the “A,” it becomes A_Mies, a clear tribute to Mies van der Rohe.

It is a seating collection that currently includes a dining chair with armrests, a lounge armchair with its ottoman, and a sun lounger, as well as tables and side tables in various shapes and sizes.

These finely crafted products, built using the best materials, are designed to withstand intensive use over time, in any climatic condition.”

GABRIELE & OSCAR BURATTI

GLOSTER

Gabriele Buratti, architect and professor of Interior Design at Politecnico di Milano, e Oscar Buratti, architect, form the architecture and design studio BURATTI ARCHITETTI.

Led by Gabriele Buratti, Gabriele and Oscar Buratti are recognized for their sophisticated and contemporary approach, seamlessly blending architecture, interior design, and product design. With a portfolio spanning luxury residential, retail, and hospitality projects worldwide, the studio is known for its precise attention to proportion, material, and detail - creating designs that are both elegant and enduring.

In the field of furniture design, they collaborate with important companies including B&B Italia, Bonaldo, Calligaris, Flexform, FontanaArte, Foscarini, Gallotti&Radice, Gloster, Lema, Living Divani, Paola Lenti, Poltrona Frau, Porada, Porro, Ditre Italia, Gervasoni, Vondom, Roca.

ITHACA

Designed by Michele de Lucchi's ADML Circle

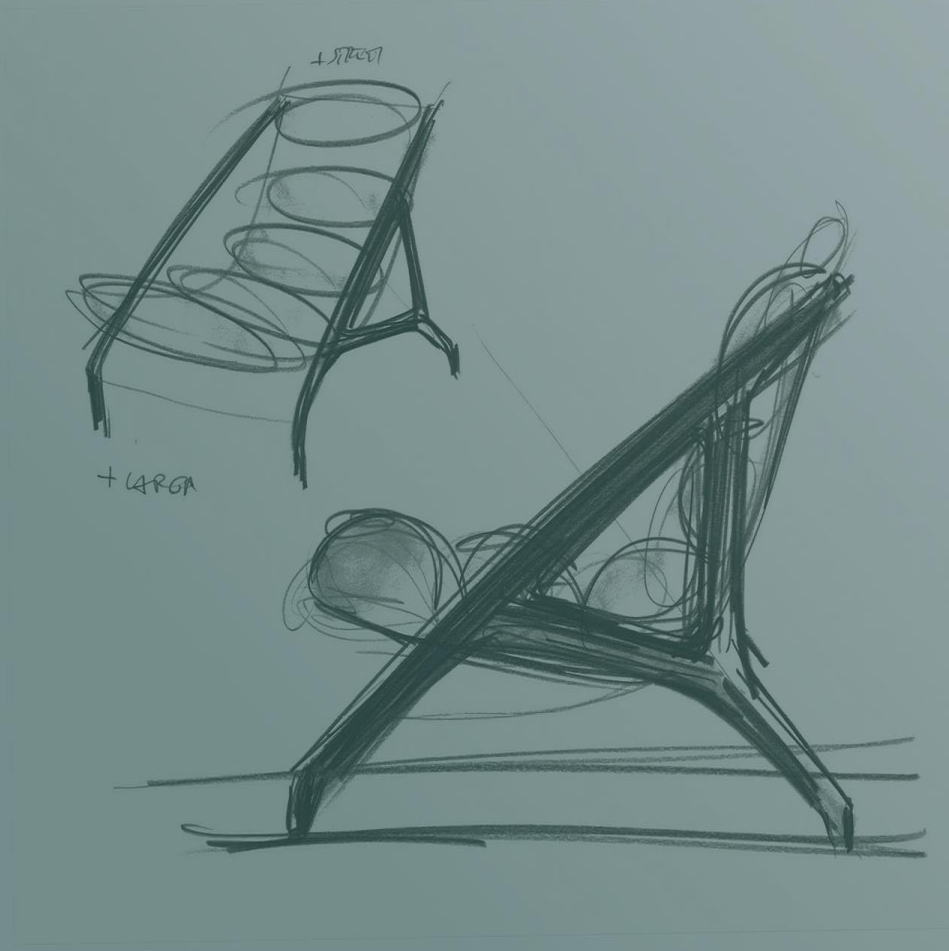

GLOSTER

Gloster presents Ithaca, a new outdoor furniture collection designed by Michele De Lucchi, celebrating the expressive and structural potential of wood. Long central to the architect's practice, wood defines the collection, shaped and crafted to create a presence that is both architectural and welcoming.

For Ithaca, De Lucchi develops taut, tapered wooden diagonals that transform structure into sculpture. The robust frames support table tops and seating elements with apparent lightness, balancing tension and stability. Precisely shaped wood is paired with soft, enveloping cushions, bringing together formal rigor and comfort.

"For many years I have worked with wood, and it remains the material that gives me the greatest satisfaction. I enjoy carving it, smoothing it, shaping it, polishing it: with wood, one never grows bored. The combination of shaped, tensioned wood and soft, enveloping cushions turns Ithaca into an island to land on."

AMDL Circle

GLOSTER

Multidisciplinary studio founded by Michele De Lucchi. Internationally renowned for its humanistic and interdisciplinary approach, the studio offers clients projects that embrace architecture, interior design, product design, and graphics. It carries out ongoing research on the future of architecture and its responsibility in imagining projects that not only acknowledge change but, where possible, inspire it.

The Milan based studio has worked with both public and private organisations, collaborating with large corporations such as Deutsche Bank, Intesa Sanpaolo, Novartis, and UniCredit. It has also designed buildings and exhibition systems for institutions like the Neues Museum in Berlin, Triennale Milano, and Gallerie d'Italia in Milan, Turin, and Naples. Additionally, the studio has designed lighting, products, and furniture for Alessi, Artemide, Cassina, Hermès, Poltrona Frau, and UniFor.

ITHACA LOUNGE CHAIR

Designed by AMDL Circle

GLOSTER

The Ithaca Lounge Chair expresses a calm, architectural clarity, where structure and comfort are brought into perfect balance. A sculptural solid teak frame defines the piece, its angled geometry creating a sense of lightness while providing a strong, grounded presence. The side profile is particularly distinctive, with gently tapered members and open triangular junctions that emphasize craftsmanship and precision.

Within this frame, a series of generously proportioned upholstered cushions form the seat and back, arranged in soft horizontal segments. This layered cushioning contrasts beautifully with the crisp timber structure - inviting, tactile, and deeply comfortable. The extended cylindrical front cushion softens the leading edge, enhancing both ergonomics and visual warmth. The result is a refined outdoor lounge chair that feels both contemporary and timeless - combining architectural discipline with relaxed, lounge-level comfort.

W - 35 D - 39.5 H - 33.5 SH - 17

ITHACA SOFAS

Designed by AMDL Circle

GLOSTER

The Ithaca Sofas extend the architectural language of the armchair into a more relaxed, familiar expression of comfort. The same sculptural teak frame provides a strong and elegant foundation, with its angled geometry and refined joinery creating a sense of lightness and precision. Within this structure, the seating becomes softer and more traditional, with generously proportioned, pillow-like seat and back cushions that invite a more casual, sink-in comfort.

This contrast between the disciplined timber frame and the relaxed upholstery gives the sofas a balanced character—structured yet welcoming. The cushions offer a plush, enveloping feel, while maintaining a clean and tailored appearance that complements the clarity of the frame. Available as both a small one-seater and large two-seater, the Ithaca sofas bring a sense of understated luxury to outdoor spaces—combining architectural definition with deep, effortless comfort.

SAMUEL WILKINSON

GLOSTER

Samuel Wilkinson Studio focuses on creating elegant work that balances form and function. With a strong understanding of materials and manufacturing, the studio aims to craft thoughtful designs that blend precision and craftsmanship with material efficiency, while minimizing environmental impact. Their work spans various disciplines, from small consumer products to larger public realm projects.

Wilkinson's studio has received recognition globally, including notable design awards: Design of the Year from the London Design Museum and the Black Pencil from the D&AD. Samuel Wilkinson's work has been included in the permanent collections of esteemed museums such as the MoMA, The Victoria and Albert Museum, The Smithsonian Cooper-Hewitt Collection, The Art Institute of Chicago, and Design Museums in London and Helsinki.

RUGS

Designed by Gloster Studio
