

GLOSTER

TEAK, CRAFTS & INNOVATION

C A T A L O G

TEAK, CRAFTS, & INNOVATION

Gloster's roots can be traced all the way back to West Africa in 1960, where a band of passionate entrepreneurs and furniture makers took the first steps on a long journey. By the late 1980's, increased demand and access to farm grown teak led us to move our factory to Indonesia.

Today, the same passion, conviction and pride that launched the Gloster brand continues to fuel our business. We may live in a different world than the one occupied by our founders, but one thing remains the same – we are furniture makers whose sole focus is to design and build the world's finest outdoor furniture.

It's all about the scene

Gloster creates outdoor furniture that brings the indoors out—transforming open-air spaces into places where people gather, unwind, and make lasting memories. Grounded in decades of experience, direct ownership of our facility in Indonesia, and long-standing partnerships with the craftsmen who bring each piece to life, our work reflects a rare level of care and continuity. The result is collections that feel enduring, thoughtfully designed, and effortlessly at home in the spaces where life unfolds.

Seed To Seat

At Gloster, teak is more
than a material—it's a legacy
we shape from the ground up.

With decades of experience and a strong partnership with Indonesia's governing teak authorities, we're uniquely positioned to source the world's finest timber. In 2018, we took that commitment even further by planting and managing our own teak farms in Indonesia.

With direct ownership of our facility and long-standing relationships with the craftsmen who bring each piece to life, we oversee every step of the journey - from nurturing seedlings to harvesting, from sawmill to kiln, and from precision machining to the final hand-finished touch.

SEED

Seedlings are nurtured in rich soil under ideal sub-tropical conditions. Our trees are given at least 40-50 years to mature, giving each tree the opportunity to develop the density, strength and rich natural oils that make teak exceptionally strong and weather-resistant.

FARM

Our farms are responsibly managed in partnership with Perum Perhutani, preserving biodiversity and supporting local communities. From there, our trained graders select only the finest logs—mature, symmetrical, and free of surface flaws—to ensure lasting beauty and structural integrity.

SAWMILL & KILN

At our sawmill, teak logs are precisely cut and then kiln-dried for up to 4 months to ensure the precise moisture content required to stabilize the wood and prevent warping or cracking over time. This essential step guarantees the durability required for life outdoors.

CRAFT

Each component is shaped, assembled, and finished by hand—where traditional craftsmanship meets modern precision. From seamless joinery to soft edges and refined finishes, every piece is built to be not only durable, but deeply luxurious. This same rigor extends beyond teak to our powder-coated frames, hand-woven elements, ceramics, and stone, ensuring that every material is held to the same exacting standard of beauty, performance, and longevity.

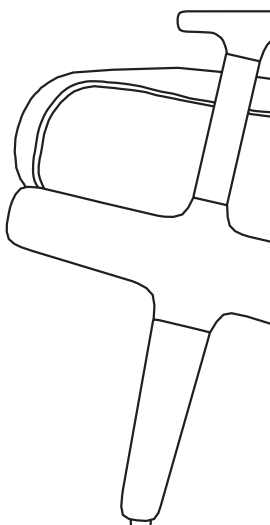

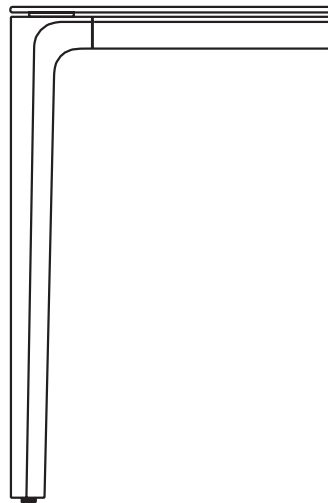

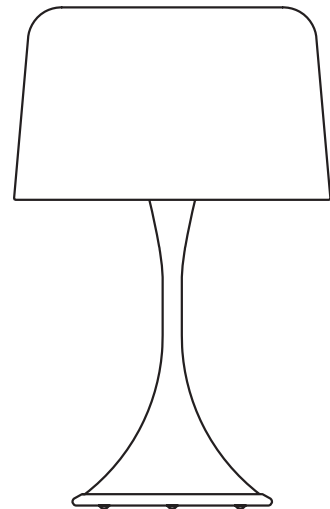

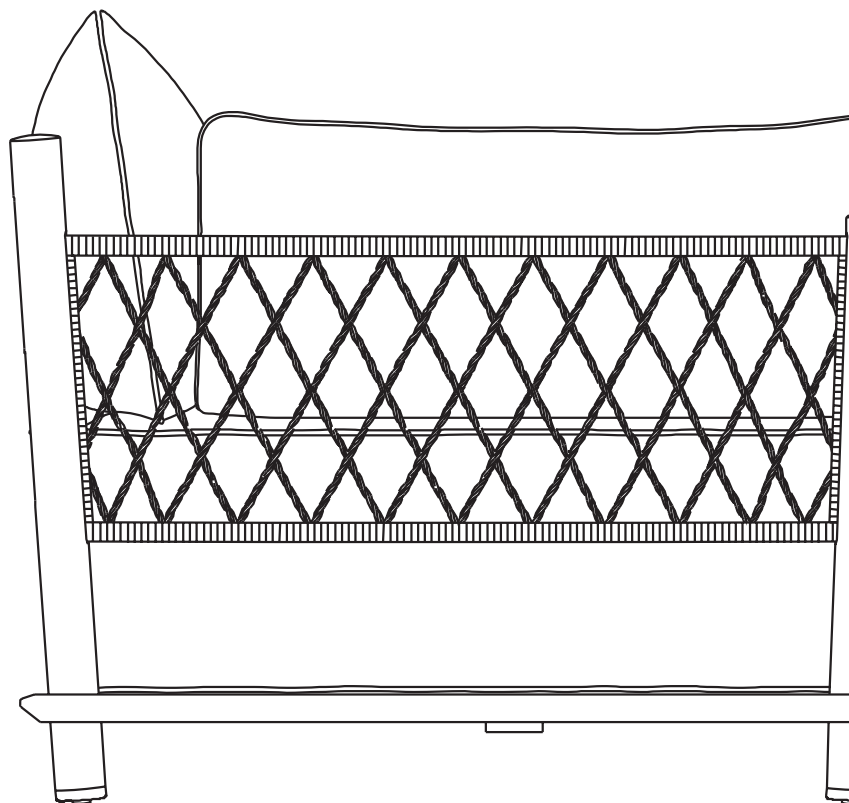

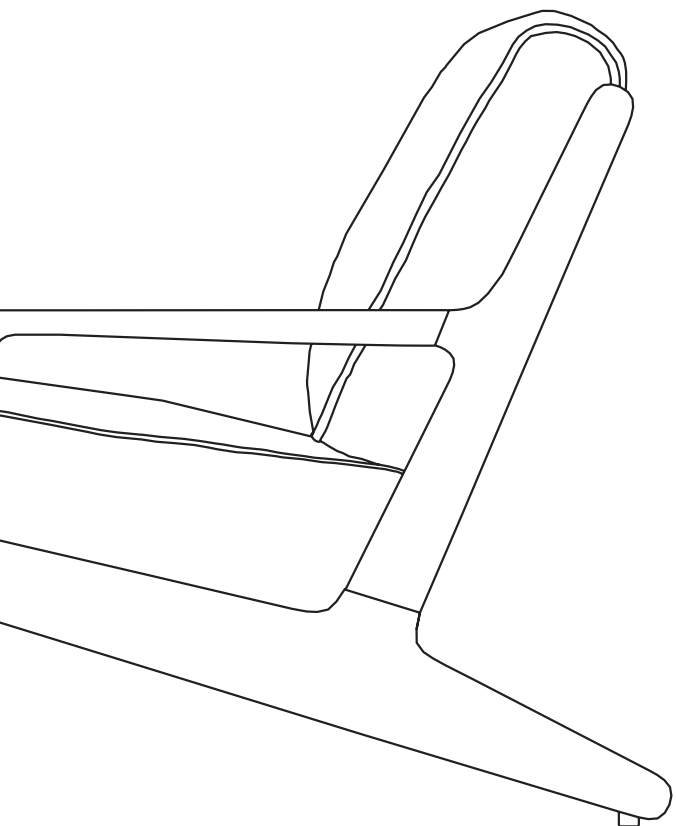

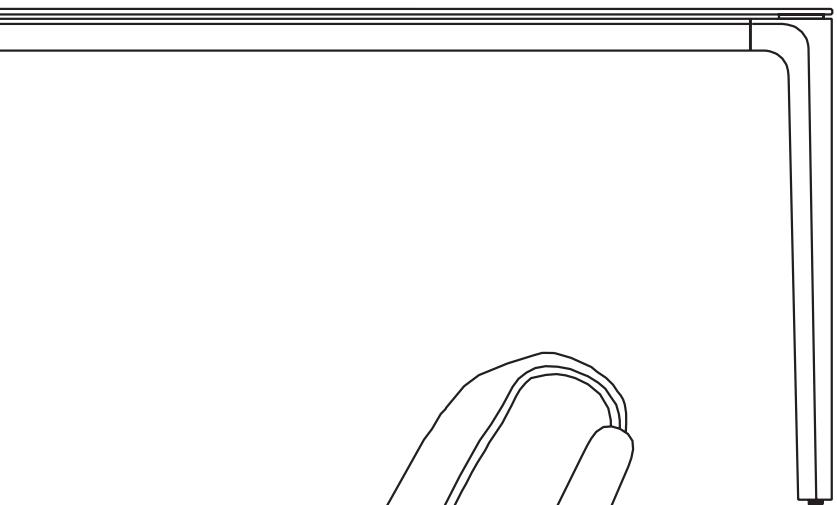

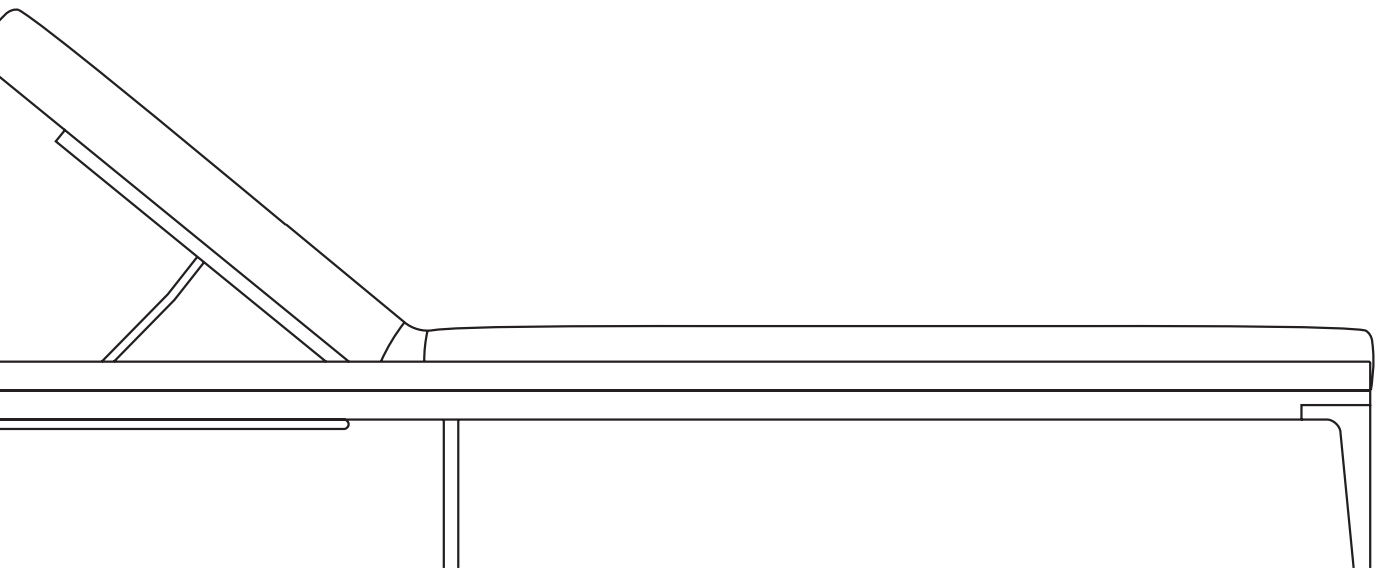

DESIGN

Exceptional craftsmanship means little without thoughtful design. Our furniture must speak a quiet, universal language—one that invites curiosity, honors tradition, and looks forward with clarity and intention.

To achieve this, we collaborate with a select group of internationally recognized designers who share our vision. These are creatives who understand how furniture lives within space—how it interacts with light, landscape, architecture, and atmosphere. They design with comfort in mind, but also with a sensitivity to proportion, material, and detail.

The result is a collection that feels effortless yet deeply considered, creating new ways to live outdoors.

DISTINCTION

Rooted in global design and crafted with care in Indonesia, Gloster Americas brings international heritage within closer reach. We connect timeless craftsmanship with thoughtful support—so each piece arrives not just beautifully made, but perfectly placed.

Our domestic cushion production is dedicated to comfort and detail, offering made-to-order upholstery complemented by a warehouse with ample domestic inventory. With showrooms across the country and a trusted network of retail and trade partners, Gloster is never far from where you are.

From first inquiry to long after delivery, our customer service team is here with thoughtful guidance and genuine care—ensuring every step feels as considered as the furniture itself.

We are Design Professionals working with Design Professionals to create memorable outdoor backdrop to life.

BAY

Can you recall that sense of escape? Of finally leaning back, forgetting your worries and staring out across the water towards the setting sun? Henrik Pedersen set out to capture the feel of sitting by the coast when designing the Bay collection. The reclined position emphasises an introspective and relaxed state of mind and is intended to create a sense of being at rest in a safe-haven.

TEAK FINISH

NOTES

Visible cracks on exposed end grain of timber components is normal. The end grain is the part of the timber where the growth rings are exposed. Although we aim to keep the presence of end grain to a minimum to reduce the risk of splits and cracks, it is sometimes inherent in the design of our product. In our Block items, we make a feature of the end grain. As the timber is exposed to changes in temperature and humidity, small cracks will open in the end grain. This will not affect the strength, performance or life expectancy of the product. In fully exposed positions, the cracks will appear quite quickly, and will be deeper. In covered locations, the cracks will be less visible.

BLOW

Bring sophisticated glazes in subtle hues to your life outdoors. The soft lines and natural tones of these beautifully rounded ceramic bases combine perfectly with plantation teak table tops. Eye-catching and inspiring, these accent pieces beautifully reflect light across their soft, round surfaces and compliment any item in the Gloster range while adding character to any outdoor space.

DECK

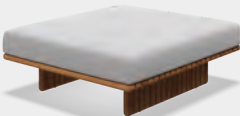

Broad, substantial, trustworthy and true, a ship's deck is literally the foundation of any voyage of discovery. Perfectly engineered to bear the weight of endless possibility and endure whatever tribulations may be encountered along the way, generous slats of resilient teak have been used for centuries to craft this impromptu footing for weary travellers, bold adventurers and pleasure seekers alike.

FERN

Inspired by the delicate fronds of a unfurling fern leaf, the Fern collection by Sebastian Herkner has a design language that harks back to nature. Combining plantation teak or powder coated aluminium with a soft finish outdoor rope, the enveloping, woven back rest both protects and provides the comfort and is attached to a typically Scandinavian style frame, which mirrors its contours and underlines the comfort aspects.

FRAME / ROPE COLOUR

FRESCO

Designed by Matteo Thun and Benedetto Fasciana, Fresco picks up on the spirit of the 1960's - the timelessness, the ease and the elegance of terraces in Rome, Aspen, the Riviera and Malibu at that time. The light, almost floating seat element on the slim, powder-coated aluminum frame resembles a shell and results in an organic and ergonomic shape.

HAVEN

Designed with a nod to the nautical, Haven combines solid teak frames with deep and luxurious seat cushions and back pillows. The subtle, rounded back and side panels are designed to envelop and enclose the occupant, creating a warm and welcoming environment in which to relax.

TEAK FINISH

GLAZE COLOURS

NOTES

Due to unavoidable variations in the firing of ceramic base tables, the final colour of the glaze may be different from the control sample included with our swatch samples.

KAY

With a dramatically curved back, Kay makes no secret of the defining factors in the design. Combining weatherproof and durable materials with a timeless teak frame, Kay is both comfortable and welcoming. The backrest is unquestionably the defining statement of the range, deliberately oversized and beautifully curved for comfort, Kay embraces you as you sit offering comfort and shelter.

LIMA

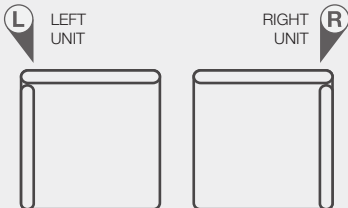

The essence of natural and tactile materials are brought together into one, defined element in the Lima modular seating collection by Henrik Pedersen. With practicality always in mind, the flexibility of modular elements ensures configuration of your hideaway however you like. Sociable seating set, more intimate chaise-longue or sofa - with Lima the only limitation is your imagination.

FRAME MATERIALS

OMADA

Freedom is indeed luxury. Omada represents the freedom to move wherever you want and the ability to sit however you want. The inherent simplicity of the modular Omada collection is also the key to its success. Use the pieces alone or combine loosely together to form a larger seating unit – the choice is yours and easy to change when the mood suits.

Benches with sap wood edge profile should only be used indoors or in a well protected area.

NOTES

Even nature occasionally needs a helping hand to aid endurance. So, from time to time, the checks and splits that are a natural feature of the RAW planks are required to be re-enforced to prevent them extending too far into the wood. For this purpose, we have designed a brass "butterfly" insert that stabilises the split in a fashion befitting of the teak raw material to which it is combined.

FRAME / SLING COLOUR

SALINA

Proudly, artfully echoing its island namesake. Salina's rustic and rugged materials are hewn, reduced and fused, refined to a point where simplicity of form infers reassuringly classic style. Then an integrated comfort delivers a contrasting opulence and promise of something truly, excitingly unique.

SARANAC

When designing Saranac, Mark Gabbertas imagined a design that combined exceptional comfort with an enduring aesthetic. A design approach which seduced rather than shouted, that one would feel at ease with immediately, and which could continue to charm for years.

SWAY

In outdoor situations we often spend more time relaxing and lounging, and when dining we tend to take our time. So why not make the situation as comfortable as possible? With Sway, Danish designer Henrik Pedersen has combined a finely proportioned teak frame with a practical sling seat and back to deliver inherent sprung comfort despite an extremely minimal profile.

NOTES

Fabric will run front to back on the cushion as you see it in the swatch book, fold-out swatch card or website configurator. This standard will cause a directional fabric to be sewn diagonal on Ventura Sectional Corner & Sectional Wedge Unit. Please contact your sales rep or customer service representative if you have any questions.

NOTES - ZENITH 2-SEATER SOFA

METEOR

NATURAL

WHEAT

The Zenith 2-Seater Sofa features a lower back and more upright seating position compared to the Zenith Lounge Chairs and Lounger. This is an intentional difference in the design to ensure maximum seating comfort.

AMBIENT LIGHTING

Light and warmth are always principal parts of the best social environments, and the most modest of devices are often the most effective. The Ambient Collection of outdoor lighting combines simplicity and light to create beautiful background illumination. Weatherproof, solar-charging LED units eliminate unsightly cables, while remote, variable switching ensures effortless use.

NOTES

NATURAL

METEOR

The teak used for the screen slats are produced from the small off-cuts that result from our standard furniture production process. As a result, colour may vary between slats and some slats may include small knots. These imperfections are purely cosmetic and do not affect the performance of the product in any way.

PROTECTIVE COVERS

Gloster protective covers are made from a heavy duty 100% solution dyed polyester. Material combining UV resistance, water resistance, breathability and durability. The ability of the fabric to breathe is essential in reducing dampness, heat build-up and condensation. This in turn reduces the chances of problems such as mold or mildew becoming present on the furniture underneath.

With Gloster's typical attention to detail, each cover is tailored to the unique dimensions of our product, ensuring a perfect fit. As well as covers for individual items, we also offer covers for all our stacking chairs, meaning that a single cover can be used for a stack of four chairs. For our modular furniture collections, adjacent covers are designed to zip and Velcro together so the entire set can be covered without the need to separate each item. All covers feature either a strap-and-clip connector or ties to ensure security against wind.

PRODUCT CARE & MAINTENANCE

Contrary to popular belief, teak furniture does not require any special maintenance routine or any additional protection apart from occasional cleaning. Left to weather naturally, teak will turn from a golden-brown colour to a light silvery grey as the pigments in the surface layer of the wood begin to fade away.

We recommend that you allow your teak furniture to weather naturally and simply clean thoroughly once or twice a year with either a water and mild detergent solution or ideally, our Teak & Upholstery Cleaner. Teak furniture may also benefit from an occasional light sanding to remove any raised grain and restore a smooth finish to the surface. Gloster Teak & Upholstery Protector can be also applied over the weathered surface to help repel moisture and to protect the teak from staining from foods and drinks.

TEAK SEALER
VOLUME · 33oz

Helps to retain the natural, brown colour of teak.

ITEM NUMBER
111275 : Teak Sealer

TEAK & UPHOLSTERY CLEANER
VOLUME · 33oz

Thoroughly cleans & brightens teak or upholstery fabrics in one step. Also use to restore & revive weathered teak.

ITEM NUMBER
111274 : Teak & Upholstery Cleaner

TEAK & UPHOLSTERY PROTECTOR
VOLUME · 33oz

Repels water & moisture and helps to prevent stains from food and drinks on teak or upholstery fabrics. Also for use on weathered teak to help retain the silver grey patina.

ITEM NUMBER
111273 : Teak & Upholstery Protector

CERAMIC CARE KIT
VOLUME · 2 x 7oz

Care kit to enable both intense cleaning and regular maintenance of the ceramic materials Bianco, Clay, Coffee, Earth, Emerald, Emperor, Iron, Nero, Sand & Smoke.

ITEM NUMBER
105662 : Ceramic Care Kit

PRODUCT CARE BOX SET
VOLUME · 99oz

Box set containing 1x 33oz bottle of Teak Sealer, 1x 33oz bottle of Teak & Upholstery Cleaner & 1x 33oz bottle of Teak & Upholstery Protector.

111276 : Product Care Box Set

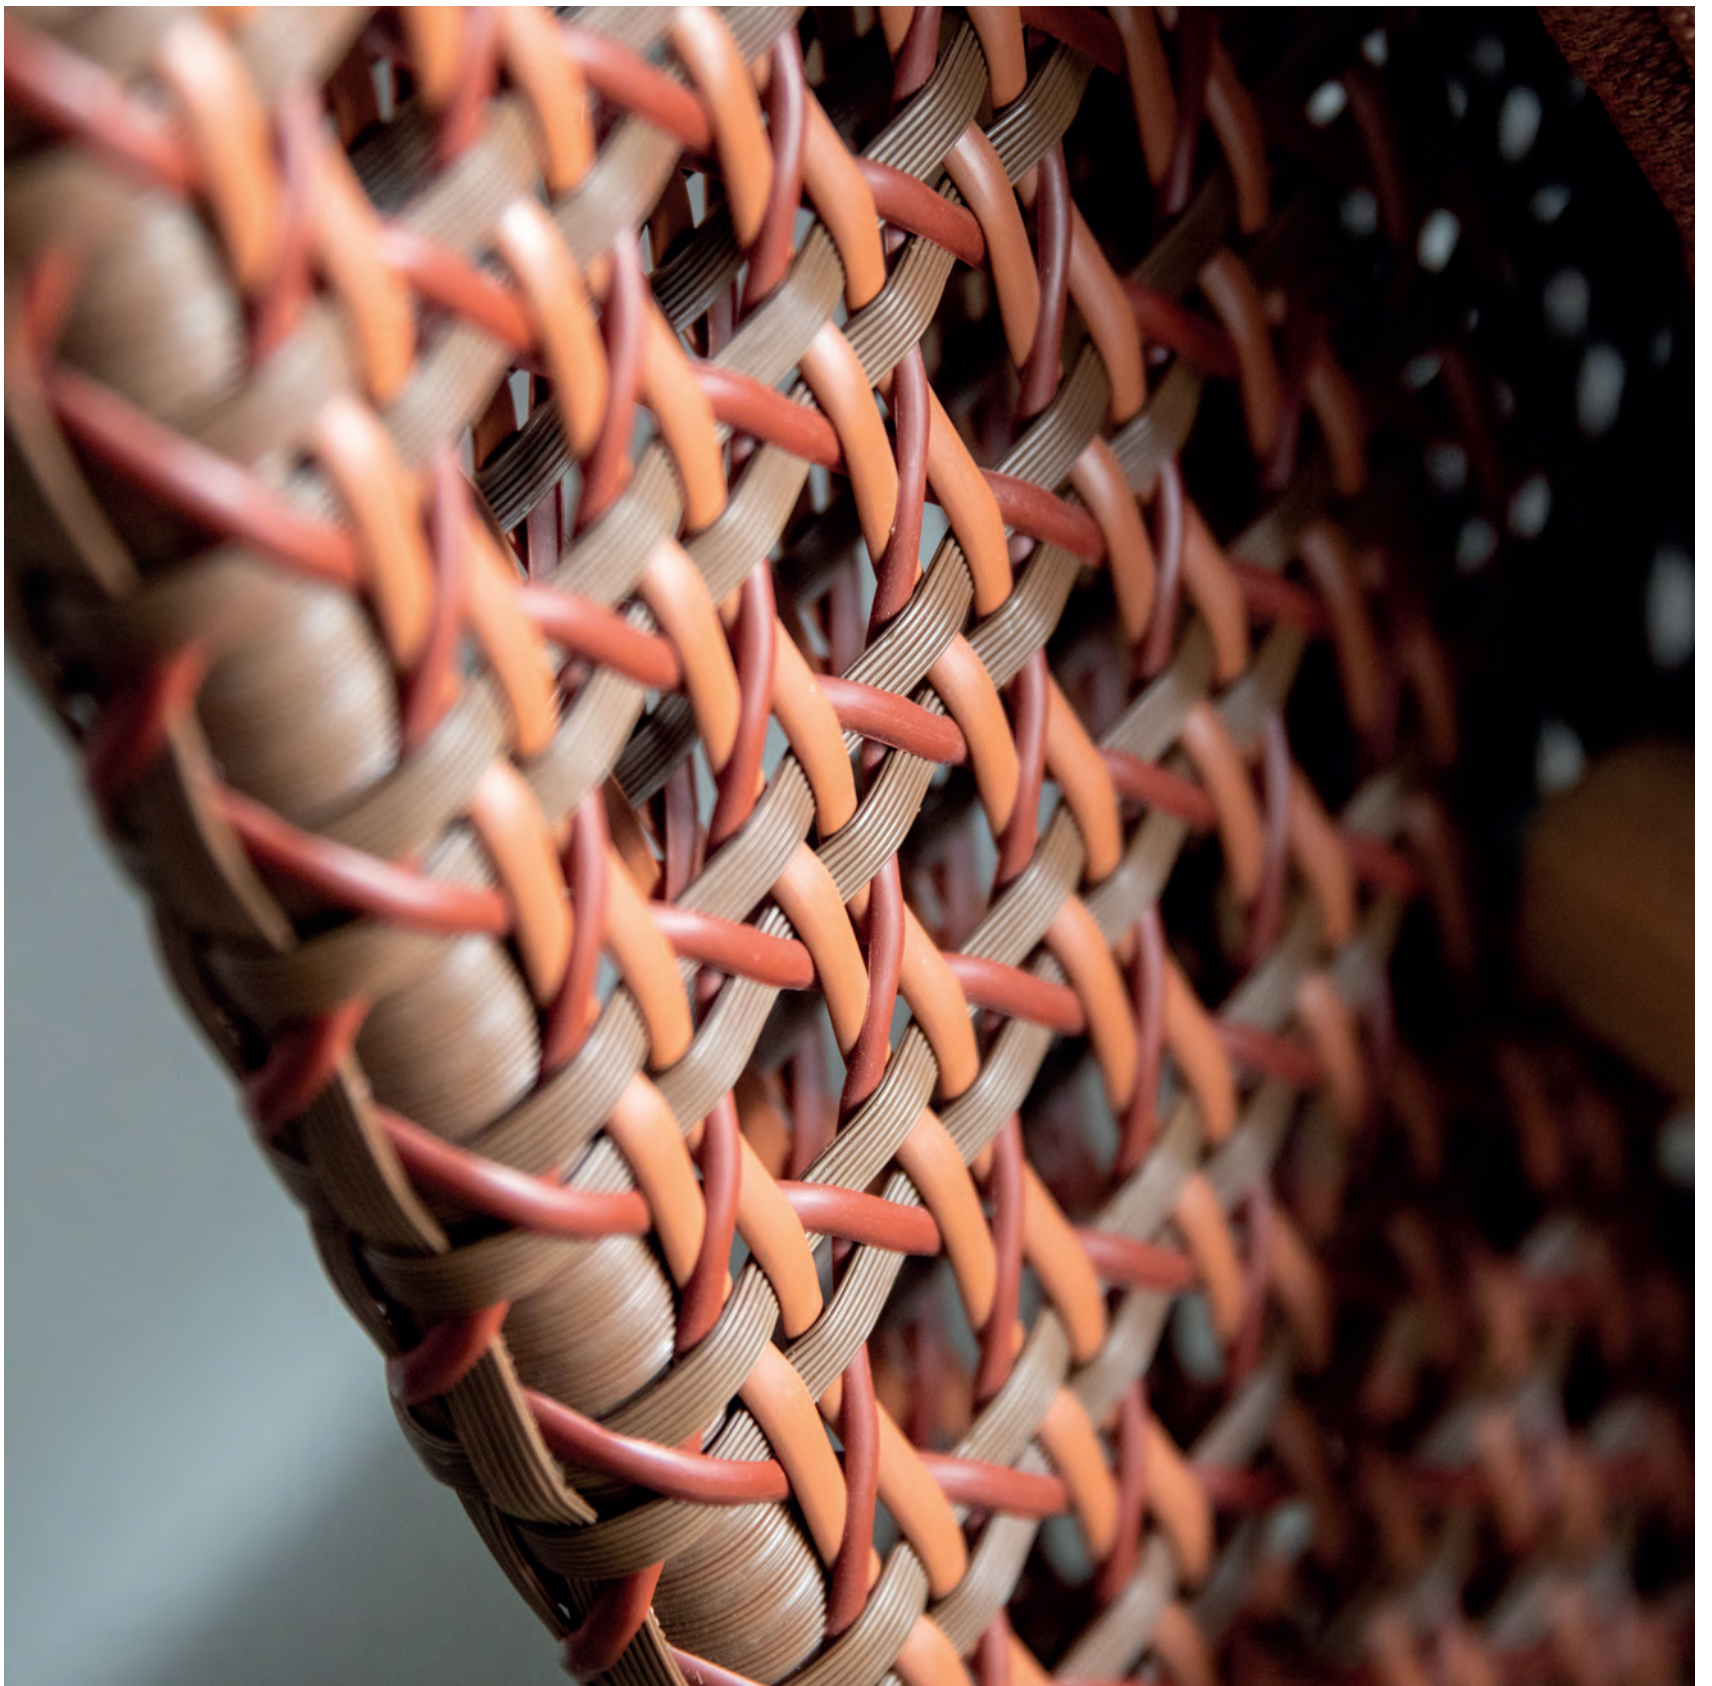

TEAK

Gloster's teak is more than a material — it's the foundation of our legacy. Sourced from sustainably managed forests, our timber is selected for exceptional density, natural oils, and color, ensuring furniture that is both durable and timelessly beautiful. We own every step of the process, from our own carefully managed sawmills and kiln dryers to the crafting each finished piece, ensuring unparalleled quality and consistency. Our timber is selected for exceptional density, natural oils, and color, producing furniture that is both durable and timelessly beautiful.

Every plank is hand-sanded, shaped, and joined with precision, preserving the wood's natural character while achieving seamless joinery and refined finishes. Proprietary finishing techniques enhance resistance to weather, UV, and wear, while highlighting the subtle grain and warmth unique to each piece.

WOVEN

Texture meets technology in Gloster's woven materials — from durable all-weather wicker to marine-grade rope, crafted to endure sun, rain, and time. Each strand is hand-woven with precision, bringing softness, strength, and tactile warmth to modern outdoor living. The result: a contemporary expression of traditional craftsmanship, where performance meets quiet luxury.

CERAMIC TABLE TOPS

Refined yet resilient, Gloster's ceramic table tops combine modern elegance with exceptional performance. Each surface is impervious to moisture, heat, and UV exposure, ensuring lasting beauty in any environment. Delicate variations in color and texture lend a natural, stone-like depth, while the precision of the finish reflects Gloster's commitment to craftsmanship. Cool to the touch, beautifully smooth, and effortlessly durable — a surface where modern technology meets timeless design

POWDERCOAT

Gloster's powder-coated frames are engineered for strength and enduring beauty. Each piece is carefully prepped, coated, and cured, creating a uniform, chip- and fade-resistant finish that withstands sun, moisture, and daily wear. Smooth, precise, and low-maintenance, our powder-coating elevates aluminum and steel into durable, refined, and luxurious furniture.

UPHOLSTERY

Gloster upholstery is designed to enhance every piece with exceptional comfort, refined detail, and enduring performance. We carefully select the best fills and details to support both form and function, ensuring each cushion looks beautiful and feels inviting over time. Made to order in our US facility, every piece is crafted with precision and care for a truly tailored result.

TEXTILES

No matter which type of fabric you choose for your furniture cushions, you can rest assured that Gloster only uses the best outdoor fabrics for maximum resistance to the fading and degrading effects of sunlight. All Gloster fabrics are finished with a water-repellent coating on the surface to reduce water absorbency. If the fabric does become wet from prolonged exposure, they will come to no harm, and the fabrics will dry out naturally. Gloster furniture cushions are offered with fabrics that fall into three distinct groups:

OUTDOOR PERFORMANCE

Offered in a wide selection of stylish and sophisticated fabrics with a soft hand, our Outdoor Performance cushions use the softest, most luxurious fillings that give the feel of the most comfortable indoor furniture. A highly water-resistant barrier beneath the outer fabric cover protects the fillings, keeping drying times to a minimum.

MAXIMUM WATER RESISTANCE

For maximum water resistance, a selection of fabrics feature a water-resistant coating that is applied to the back face, helping prevent water travelling beyond the surface of the fabric. Although not offering quite the same soft hand as our other fabrics, these water-resistant fabrics are very practical and quick drying. The fillings inside the cushion are engineered using open cell materials to allow for maximum air circulation, helping to speed up the drying process even further.

MAXIMUM SOFT TOUCH

Combining with all the benefits present in Outdoor Performance cushions, Gloster offers this range of exclusive, knitted outdoor fabrics, the first to be produced using 100% solution dyed acrylic yarns. These knitted fabrics offer the ultimate in terms of softness, giving a sumptuous cosy feel, while the inherent stretch allows for the perfect fit to even the most demanding of cushion shapes. The Wave fabrics feature a unique, 3D knitted structure giving levels of texture and softness unparalleled in outdoor fabrics.

TEXTILES SPECIAL FEATURES

WATER RESISTANT TEXTILES

These fabrics are treated with a weatherproof coating that minimises water absorption and enables the cushion to dry out much faster than standard fabrics. Fabrics can be completely moisture-free within minutes after a simple wipe-down. When wet, the fabric threads expand slightly, meaning any water simply beads up on the fabric surface, rather than seeping into the cushion filling and leaving behind residual moisture. These fabrics are a little stiffer than the traditional Sunbrella fabrics, but they share the same market-leading performance in terms of durability, fade resistance, and ease of cleaning - making them the ideal choice for all outdoor living and dining spaces.

RECYCLED CONTENT TEXTILES

Recycled fabrics combine up to 50% post-industrial recycled fibre with virgin fibre to achieve vintage charm, rich colouration, soft feel and excellent performance. Due to the nature of the recycled content, recycled yarns may exhibit random colour specks and shade variation. These slubs can sometimes be a contrasting colour.

The recycled and virgin fibres are blended to help ensure that the product meets stringent performance standards. Due to the recycled nature of this fabric, the colour may vary between production batches and large sections of recycled yarns may run sporadically throughout the fabric. The presence of these recycled yarns should not be interpreted as imperfection, but as part of the character of the recycled fabric.
