Material Properties
Gloster outdoor covers are custom fitted and made from taupe coloured Weathermax, a heavy duty 100% solution dyed polyester material.

Weathermax is a performance cover material combining UV resistance, water resistance, breathability and durability. The ability of the fabric to breath is essential in reducing dampness, heat build-up and condensation. This in turn reduces the chances of problems such as mould or mildew becoming present on the furniture underneath. We also add a ‘breather’ layer of Dacron where the covers are in contact with table tops to further aid breathability.

With typical attention to detail, each cover is tailored to the unique dimensions of our product, ensuring a perfect fit. As well as covers for individual items, we also offer covers for all our stacking chairs, meaning that a single cover can be used for a stack of four chairs. For several of our modular furniture collections, adjacent covers are designed to zip and Velcro® together so the entire set can be covered without the need to separate each item.

All covers feature either a strap and clip connector or ties to ensure security against wind.
PROTECTIVE COVERS FACT SHEET

Fitting Instructions - Single Unit
